

# Handset Designer 2007

## Download and Install Instructions

There are three software products to download and install for your evaluation of Handset Designer 2007. Follow the instructions below for each product. To download, you will need a high speed internet connection. If you have CD's you can install using each CD in the order below.

### 1. Install BidMaker R3 (optional)

1. To download, start your web browser and navigate to the following URL:  
<http://www.avontus.com/evaluation/evaluation.aspx>
2. Download and run the downloaded setup.exe file.

### 2. Install Microsoft Office Visio 2007

If Microsoft Office Visio 2007 is already installed on your computer you can skip this section.

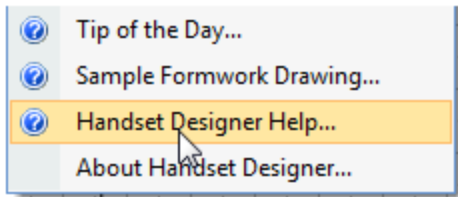

1. To download, start your web browser and navigate to the following URL:  
<http://www.trymicrosoftoffice.com/>
2. Click on the Try Now button next to Microsoft Office Visio Standard 2007
3. Follow the instructions and fill out all required information. You will be sent an email with download and installation instructions from Microsoft. Follow these instructions to install Microsoft Visio.

### 3. Install Handset Designer 2007

1. Start your web browser and navigate to the following URL:  
<http://www.avontus.com/handset/downloads/setup.exe>
2. Follow the on screen instructions to save and run the installation.

### 4. Run Handset Designer 2007

1. Double click the Handset Designer icon on your desktop.
2. Enter your registration information and serial number.

You should now have Handset Designer up and running. Review the Quick Start guide included in the help system.

For help and assistance please email [support@avontus.com](mailto:support@avontus.com).

## Installing Visio .Net Programmability Support

If you run Handset Designer and get an error during installation about Visio .Net Programmability Support, or when running Handset Designer you don't see the formwork stencil, menu, or toolbars, then it's likely a required Microsoft Visio component is missing. To repair Visio, have the original installation files available and follow these steps:

1. Go to your Control Panel by clicking on the Start menu and the Control Panel icon.
2. Double click on the Add/Remove programs item. Scroll to the Microsoft Office Visio program item.
3. Highlight the program in the list and select Change button. This starts the Visio installation and repair program.
4. Click the 'Add or Remove Features' radio button, then click Next.
5. Expand the Microsoft Office Visio group, click the dropdown button for .Net Programmability Support and from the menu that appears click the 'Run from My Computer' item.
6. Click the Update button to complete the installation.
